GAIYUE LI (Esme) | 李盖玥

AI Applications • Python Desktop Software • Data Analysis & Project Support

+65 9379 4863 / +86 187 0811 5213 | esmegai0617@gmail.com

PROFESSIONAL SUMMARY

Software Engineering graduate with two bachelor's degrees and hands-on experience supporting AI-enabled software applications, Python/PySide6 GUI development, data analysis and software testing. Experienced in translating engineering workflows into usable digital tools, validating outputs, troubleshooting issues and collaborating with technical teams. Additional strengths in Grafana reporting, documentation and cross-functional coordination.

TECHNICAL SKILLS

AI application workflows, Python, PySide6 / Qt, GUI functional testing, Python test scripts, pytest, SQL, InfluxDB, Grafana, Git, VS Code, JSON/CSV, ezdxf, DWG/DXF processing, BOM data, Excel, technical documentation

PROFESSIONAL EXPERIENCE

Data Analyst / Software Project Support — Aug 2026 – Oct 2026

Tiancheng Electrical Marine Equipment Pte. Ltd. | Singapore

- Supported equipment data workflows between cloud InfluxDB and local databases; used SQL and data checks to identify anomalies and assist engineering troubleshooting.
- Built Grafana dashboards for equipment telemetry comparisons, visual monitoring and reporting.
- Supported technical research, Generative Engine Optimization (GEO) and website content updates by organising product information, publications and relevant search terminology.

SELECTED AI & SOFTWARE PROJECT

AI Digital Management System — Oct 2026

Python / PySide6 offline desktop application | Tiancheng

- Contributed to the design, implementation and testing of a bilingual Python/PySide6 desktop GUI for engineering drawing and data-management workflows.
- Implemented and validated interface workflows covering DWG/DXF import, previews, editable fields, progress feedback, input checks, error messages and manual review.
- Used manual checks and Python-based test scripts to verify GUI interactions, parameters, application outputs and error-handling scenarios; investigated and reported issues.
- Supported DXF-to-JSON/CSV data processing and drawing digitisation, including a 44-sheet pilot set and 186 BOM rows; collaborated with engineers on workflow improvements and documentation.
- Explored AI-assisted parameter interpretation workflows and checked parsed inputs against expected application parameters; supported review of generated outputs.

ADDITIONAL EXPERIENCE

Administrative & Technical Support — Aug 2023 – Aug 2026

Chengdu Jinjiang Talent Development Co., Ltd. | Chengdu, China

- Financial & Contract Management: Managed departmental expense reimbursements, financial records, and contract reviews, ensuring accuracy, transparency, and efficient financial operations.
- Administrative Coordination: Coordinated staff schedules, employee documentation, contract administration, internal communications, and daily office operations.

- Documentation & Reporting: Prepared weekly and monthly reports, meeting materials, official documents, and maintained departmental records and archives.
- Back-office Data Management: Used internal business systems, Excel and reports to enter, update, reconcile and retrieve operational records.
- Systems & Data Support: Assisted with data accuracy checks, routine back-office system use and workflow improvements.

EDUCATION

Bachelor's Degree in Software Engineering | Chengdu University of Technology | Sep 2019 – Sep 2023

Bachelor's Degree in Software Engineering | Oxford Brookes University | Sep 2019 – Sep 2023

LANGUAGES

Chinese: Native | English: Basic working proficiency (CET-4)
